

Softstart Sirius 3RW50, 480V, 210A ,132kW, 24V AC/DC

SIRIUS soft starter 200-480 V 210 A, 24 V AC/DC Screw terminals Analog output Soft starter SIRIUS 3RW50 Basic Performance for simple applications for soft starting and stopping of three-phase asynchronous motors. Soft starting, reduction of current peaks, prevention of supply voltage fluctuations during startup, reduction of load on the power supply network, reduction of mechanical load in the drive, considerable saving of space and wiring compared to star-delta (wye-delta) starters and frequency converters, maintenance-free switching and extremely easy handling. The integrated bypass allows a very compact construction, saves energy and ensures low heat dissipation in the control cabinet. Intelligent monitoring functions protect the soft starter against overheating and the motor against overload. In addition, you can limit the current during startup to a settable maximum value. The innovative Soft Torque function ensures that the motor is started gently. With the integrated remote reset, you can quickly and easily clear faults from a remote location. Worldwide approvals (e.g. IEC and UL/CSA), also for applications in hazardous areas (ATEX or IEC Ex). The Basic Performance 3RW50 soft starters are available for supply systems up to 600 V in a performance range up to 315 kW with 24 V or 110-250 V control supply voltages and all with both screw and spring-type terminals. Different device versions are available for analog output and thermistor motor protection. Optional communication modules allow connection via PROFINET, PROFIBUS and Modbus TCP. Various HMI modules are available for installation in the control cabinet door. The 3RW50 soft starters replace the tried and tested 3RW40 series (size S6 to S12). SIRIUS 3RW5 soft starters - As flexible as your tasks.

Informacje ogólne

GTIN/EAN	4047621060552
Alt. ID produktu	3RW5072-6AB04
Nazwa producenta	Siemens
ID produktu wg producenta	3RW50726AB04
Kraj pochodzenia	Czechy
Kod celny	85371098

Opis ETIM

Klasa	Układ łagodnego rozruchu silnika (EC000640)
Grupa	Urządzenia niskonapięciowe (EG000017)
Znamionowy prąd pracy le przy temperaturze otoczenia 40°C	210 A
Znamionowe napięcie pracy Ue	200..480 V
Znamionowa moc silnika trójfazowego, podłączenie standardowe, przy 230 V	55 kW
Znamionowa moc silnika trójfazowego, podłączenie standardowe, przy 400 V	110 kW

Funkcja	Układ jednokierunkowy
Wbudowany stycznik (Bypass)	Tak
Regulacja momentu obrotowego	Nie
Znamionowa temperatura otoczenia	40 °C
Znamionowe napięcie sterowania Us dla AC 50 Hz	24..24 V
Znamionowe napięcie sterowania Us dla AC 60 Hz	24..24 V
Znamionowe napięcie sterowania Us dla DC	24..24 V
Rodzaj napięcia sterowania	AC/DC
Klasa wyzwalania	Regulowany
Stopień ochrony (IP)	IP00
