ÖLFLEX® HEAT 125 MC 450/750 V

Application

ÖLFLEX® HEAT 125 MC 450/750 V are heat resistant, highly flame retardant, halogen-free, multi core cables with a cross-linked polyolefin copolymer compound for occasional flexible use and fixed installation subject to medium mechanical load conditions. Further special features: wide temperature range, ozone-, UV-light- and oil resistant.

These cables are halogen-free, and with low toxicity and smoke density in case of fire. It is possible to use the cables where human and animal life as well as valuable property are exposed to high risk of fire hazards.

Application range:

For safety in areas with high density of people, public buildings; airport, railway station, for the wiring and connection of lighting, heating appliances, control cabinets, and distributors in mechanical and plant engineering, heating and air conditioning systems, for use in traffic regulation systems and outdoors.
